## Working with Master Pages in InDesign

### Notes:

1. Master Page = A page where you put items which you want repeated on multiple pages.
2. Open Master Pages Panel = Window --> Pages
3. Apply editing mode to the master page = with the Master Pages Panel open double click on the masters page.
4. Master titled "None" = Will remove all master templates from a page. To apply = drag and drop to page.
5. To rename a master page hold down "alt" on the keyboard and click on the master page name.
6. To apply a master page = Select the page, hold alt and click on the master you would like to apply
7. Items on the master page are identified on a standard page with a dotted outline.
8. To unlink an item from a master page hold command + shift and click on the item
9. You can duplicate a master page by selecting it and dragging it down to the "create new page" icon.
10. Using multiple master pages come in handy with longer documents.
